Aim :- To study emerging trends in low code Application development and understand how low code.

Introduction :-

low-code Application develop user to Create Application using visual interface drag and drop components and minimal hand code written hand written code

Emerging tools :

1) AI - Assisted development
= AI is increasingly used to generated code, work flows and Application C

2) Mobile Application Development
low-code platform provide quickly ready responsive mobile Applicat

3) Cloud - Based
= mageble online

4) workflow automation:-

Business use low-code automate reptitve tasks

5) Integriation with API

= integrate with database

6) Citizen development

= non-programmer

business application with minimal coding knowledge

Result:-

The emerging tool in low code application development were survived and this simplifying application was understood
